

# Accessories – tent interior

## Inner-tent Pro

Tentipi® Nordic tipis have been designed to function well even without an inner-tent. Nevertheless, an inner-tent does provide a number of advantages:

- Teflon impregnated ripstop fabric gives protection against condensation which is especially important for Nordic tipis made of lightweight material.
- Condensation caused by ground dampness is eliminated because the floor covers the entire ground area of the tent.
- Gives cosy comfort and protects you from ground dampness; dirt and snow can be more easily kept away.
- Heat sources function more effectively and the heat is distributed more evenly when retained by double tent fabrics.
- More reliable protection against ants, mosquitoes and other insects.
- Transforms the simple Kvarts Nordic tipi into an advanced mountain tent with superior ventilation, even when there are many mosquitoes.

Because it is possible to have a fire or stove inside the inner-tent, there are no disadvantages.

### A. Easy to put up

Is put up together with the Nordic tipi or can be easily detached by using the reliable quick fastenings.

### B. Ventilation

Closable insect net over the smoke opening; fits tight around the middle pole. Three fresh air intakes are built into the inner-tent.

This guarantees the best possible ventilation on hot and sunny mornings and days, even when the air is full of mosquitos.

### C. The floor's features

The floor of the inner-tent has the same features and basic construction as Floor Pro (see opposite page).

### D. Tension relief – tent fabric

#### E. Net roof holder

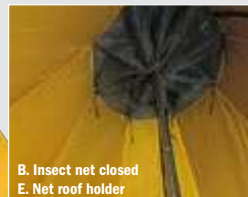

Reduces the risk of damaging the net when using a stove or open fire.

#### F. The fabric

Both the floor and walls are made of light, strong, high tenacity polyamide fibre which is much stronger than the material used in standard fabrics. Class of product **PRO**.

(Read more about the fabrics on pages 54–55.)

10405 Inner-tent Pro 5 (2250 g)  
10707 Inner-tent Pro 7 (2870 g)  
10909 Inner-tent Pro 9 (3960 g)

## Inner-tent Comfort

Same construction as Inner-tent Pro but made out of a carefully chosen standard-type material. Class of product **COM**.

11405 Inner-tent Comfort 5 (2350 g)  
11707 Inner-tent Comfort 7 (2970 g)  
11909 Inner-tent Comfort 9 (4200 g)

### IT top connection

Used for putting up the inner-tent on its own, ie. without a Nordic tipi. Practical in warm conditions although it is not rainproof or storm-resistant.

12565 IT top connection

IT top connection

## Floor Pro

Lightweight floor. Made of the best possible material to achieve both low weight and good water protection.

### G. Need not be detached

Is automatically in the correct position when the Nordic tipi is put up because it need not be detached when packing the tent.

### H-J. Flexible opening

The floor has four zips which allow flexible opening possibilities.

H. 'V-opening': open from the door. To avoid having dirty shoes on the tent floor.

I. 'O-opening': open from the centre and outwards. This allows you to brush off bread crumbs on the ground rather than on the floor. Also enables use of stove or open fire; (caution is recommended).

J. 'U-opening': a large opening from the door and round the central pole. For wood storage, open fire or to have ground contact.

### K. Zip cover

Protects the zip from dirt.

### L. Stretches out nicely

Stretching device which makes it easy to get the floor nice and flat. Also makes it easier to seal between the floor and fabric which keeps out mosquitos better.

### M. The fabric

Made of light, strong, high tenacity polyamide fabric which is much stronger than standard fabrics. Class of product **PRO**.

(Read more about the fabrics on pages 54–55.)

11005 Floor Pro 5 (1500 g)  
11007 Floor Pro 7 (1800 g)  
11009 Floor Pro 9 (2700 g)

## Floor Comfort

Same construction as Floor Pro but made out of a carefully chosen standard-type material and without the possibility of having a U-shaped opening. Class of product **COM**.

12050 Floor Comfort 5 (1900 g)  
12070 Floor Comfort 7 (2400 g)  
12090 Floor Comfort 9 (3200 g)  
12150 Floor Comfort 15 (4000 g)

## Drying rail set

Light, attractive and stable, circular drying rail of hardened aluminium. No dangerous rods sticking out.

A complete set for each size of tent includes drying rail and suspension straps. You can easily add a second rail. They are best suited to Safir and Zirkon without an inner-tent, but can also be fitted in Kvarts and all inner-tents.

12587 Drying rail set 5 (340 g)  
12588 Drying rail set 7 (390 g)  
12589 Drying rail set 9 (440 g)  
12593 Drying rail set 15 (500 g)  
12590 Drying rail 5 (2.5 m), for sets 5–9  
12591 Drying rail 7 (3.4 m), for sets 7–9  
12592 Drying rail 9 (4.3 m), for sets 9–15
